

Tips for Using Teams Meeting Language Settings Independently

Empowering Seamless Cross-Border Communication for Global Teams

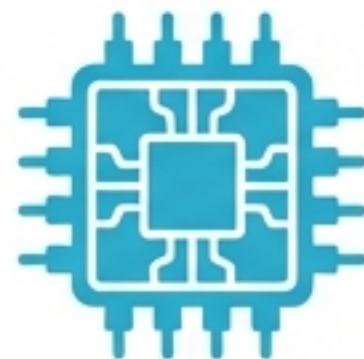

Breaking Language Barriers Across 20+ Countries

As your partner in cross-border operations, Evershine supports multinational corporations in over 50 cities. We recognize that clear communication is the foundation of your global success.

Global Reach

Operating across distinct linguistic regions requires independent, real-time adaptability.

AI Enablement

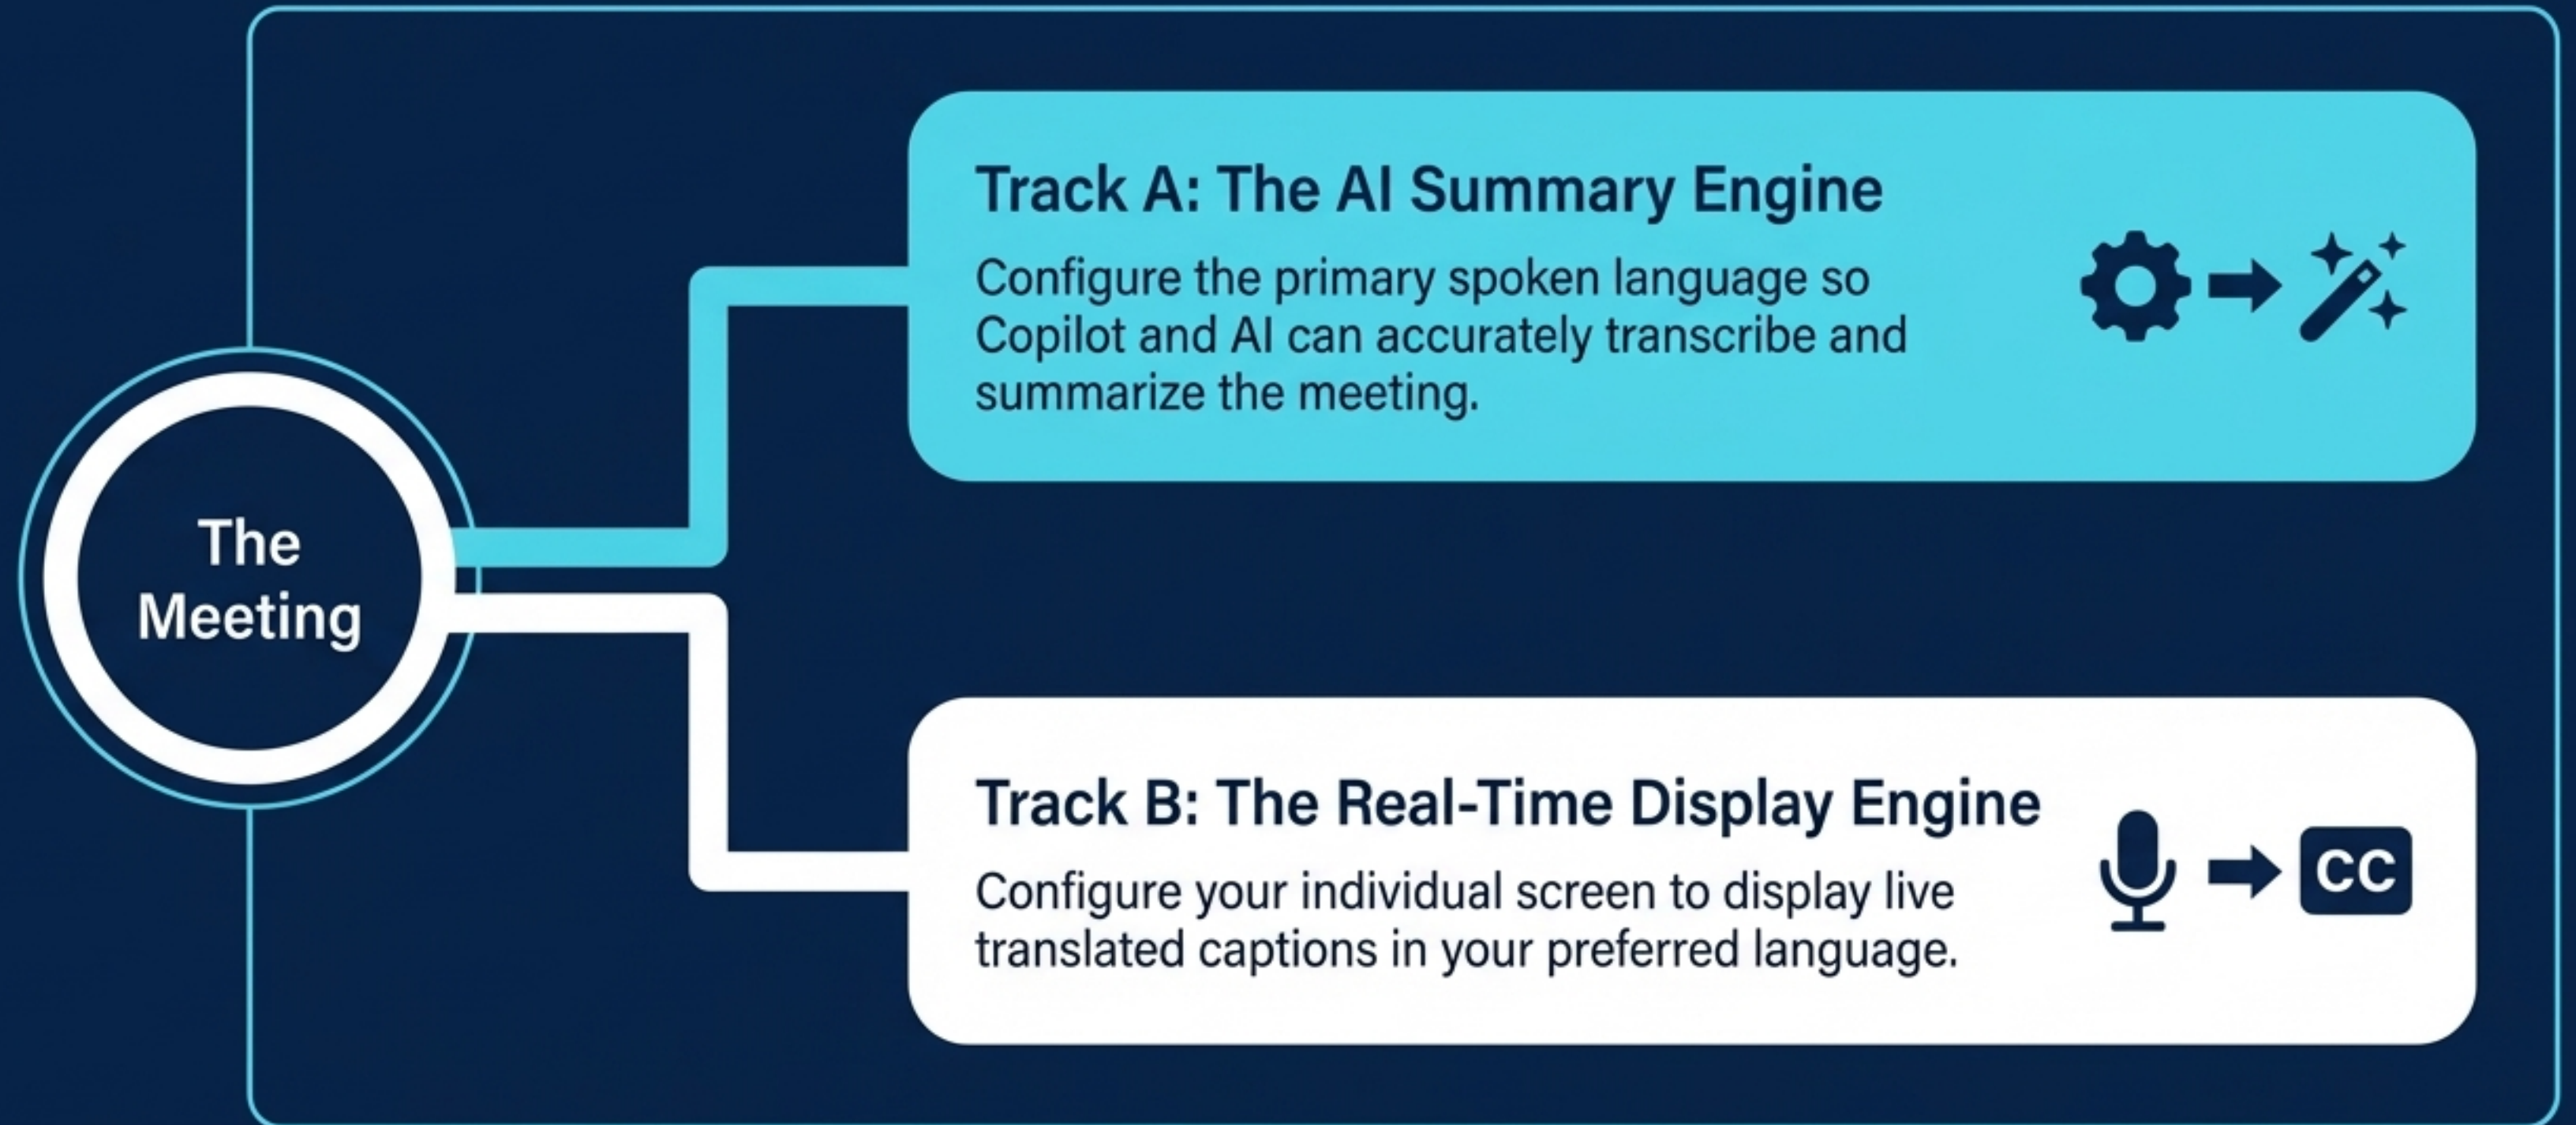

We provide our clients with the precise workflows needed to unlock advanced AI-powered translation tools natively.

Seamless Meetings

This blueprint empowers every individual participant to control their own language experience, ensuring total alignment.

The Universal Two-Step Translation Engine

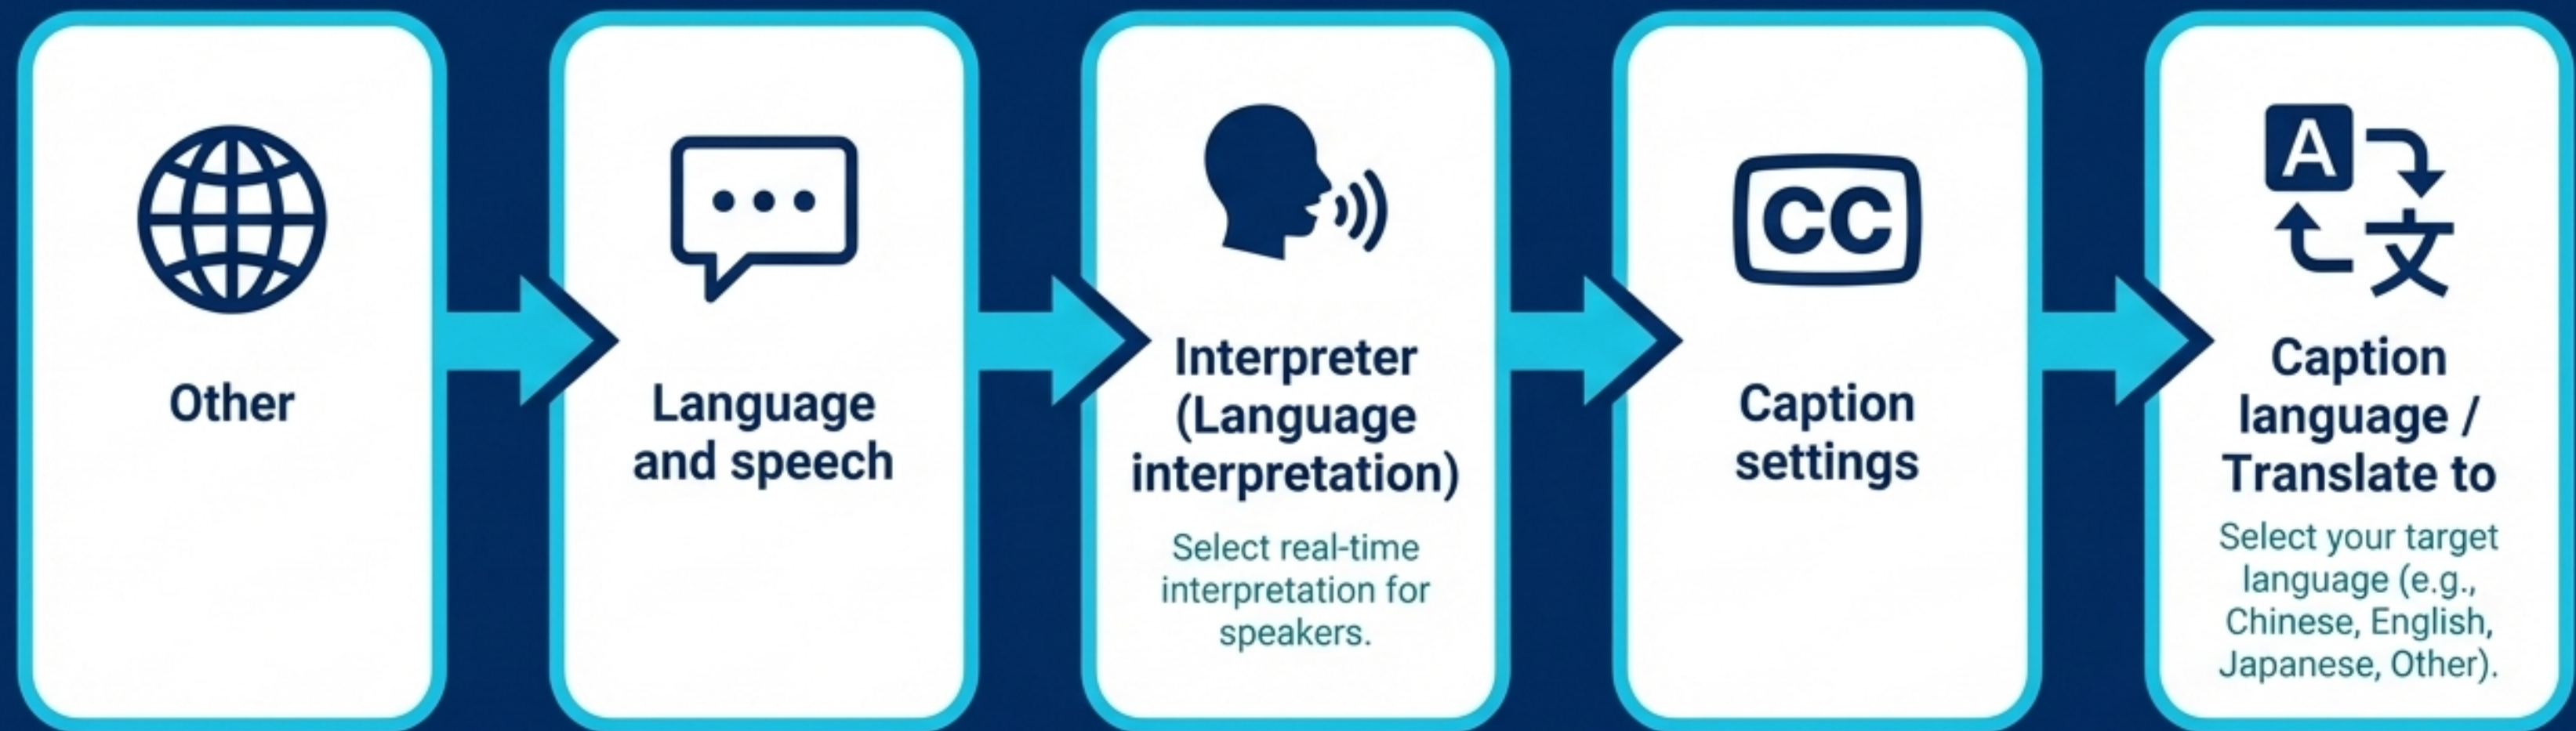

Track A: Empowering AI and Copilot Summaries

This sequence ensures the system knows which language is currently being spoken, enabling accurate automated meeting summaries.

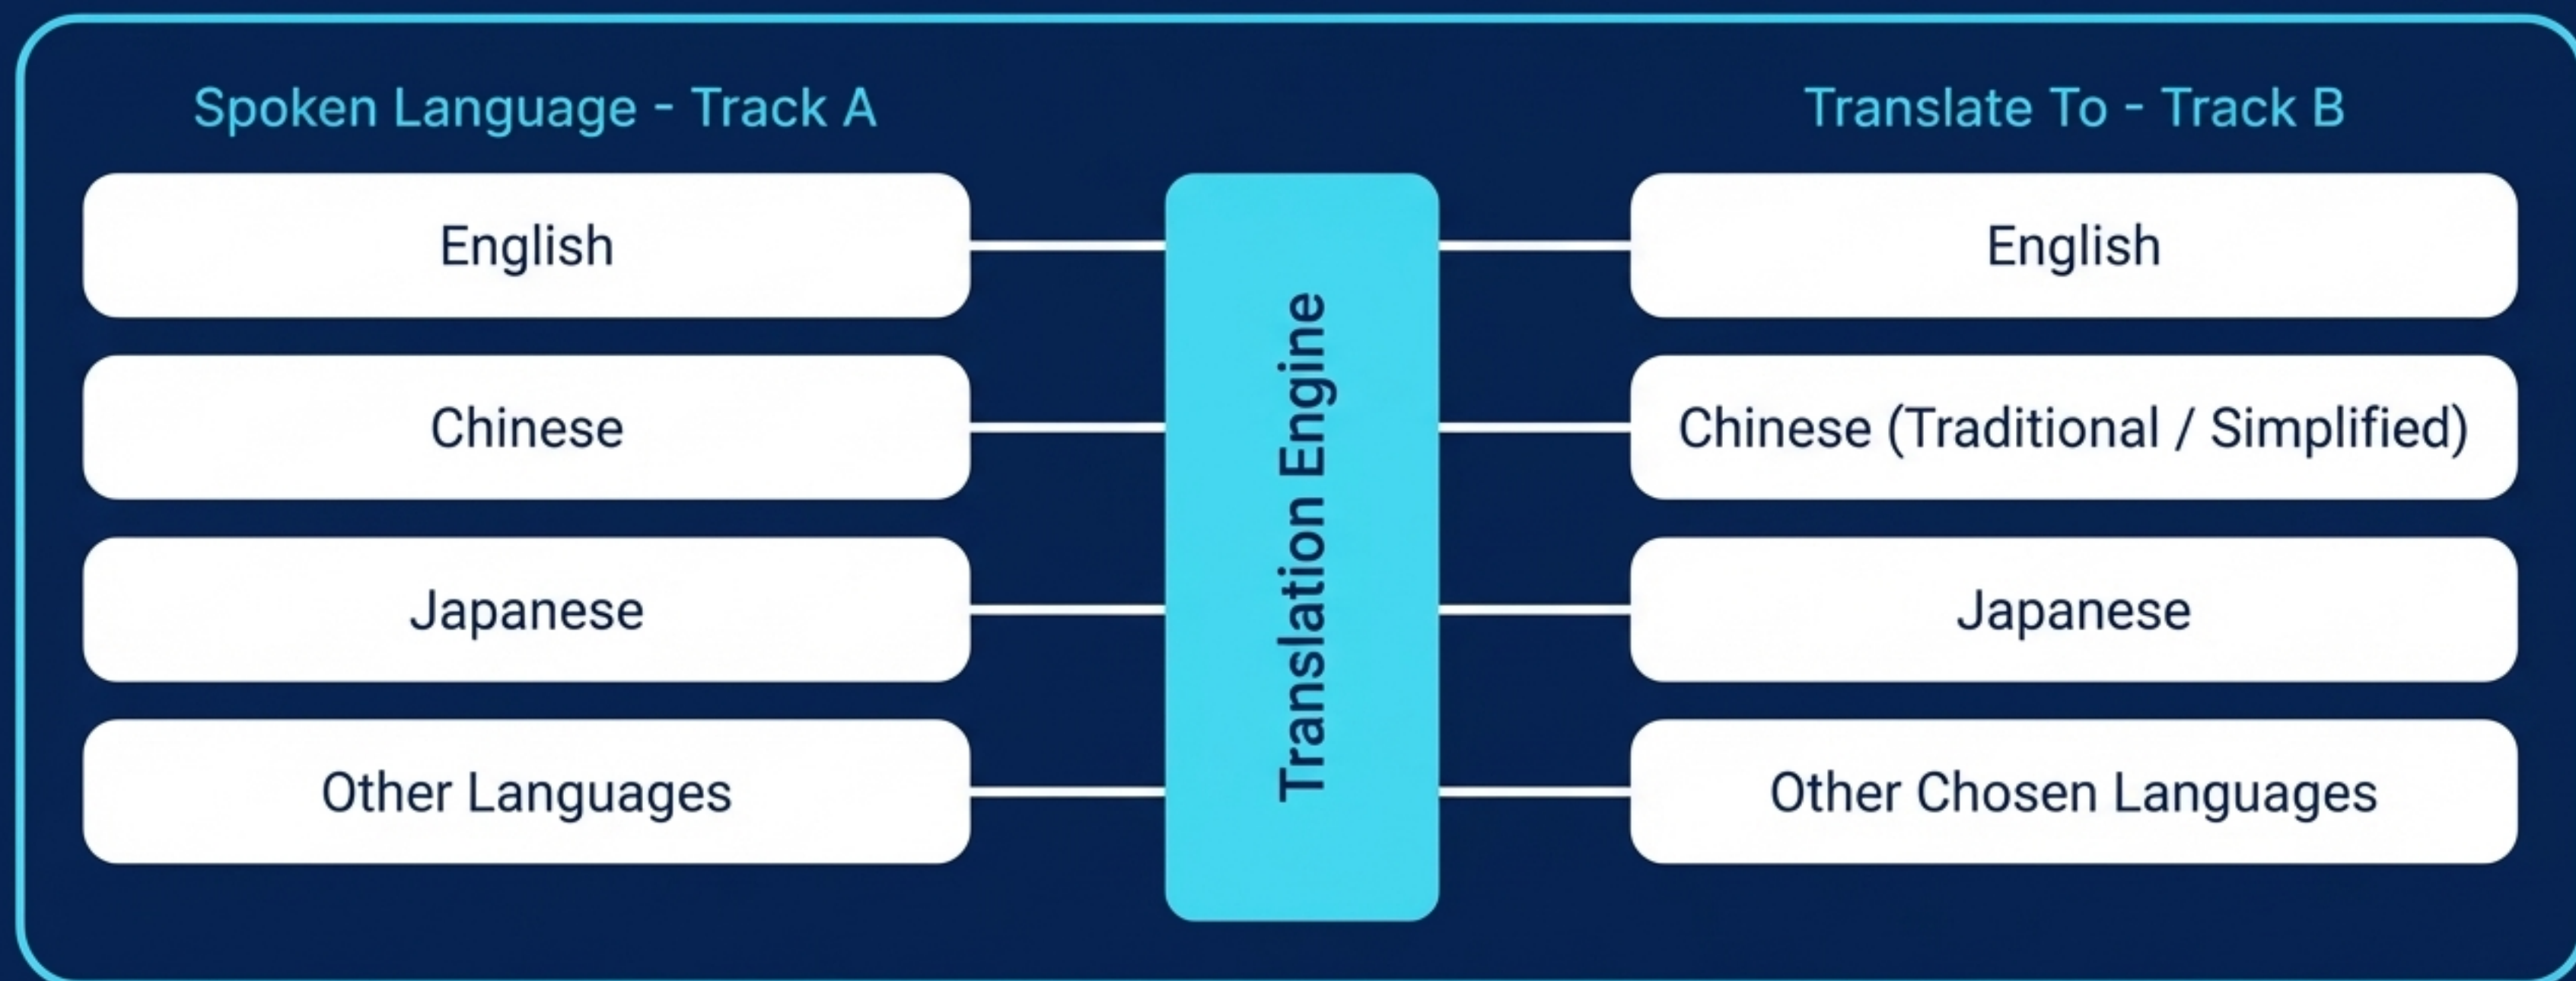

Track B: Activating Real-Time Interpretation & Captions

This sequence allows individual participants to receive real-time translated captions, regardless of what the main speaker is saying.

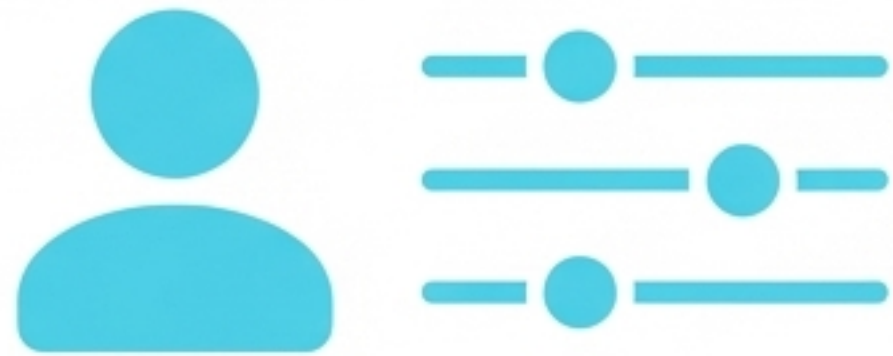

The Universal Language Mapping Matrix

Because the settings are independent, Evershine clients can achieve total alignment regardless of the host's native tongue.

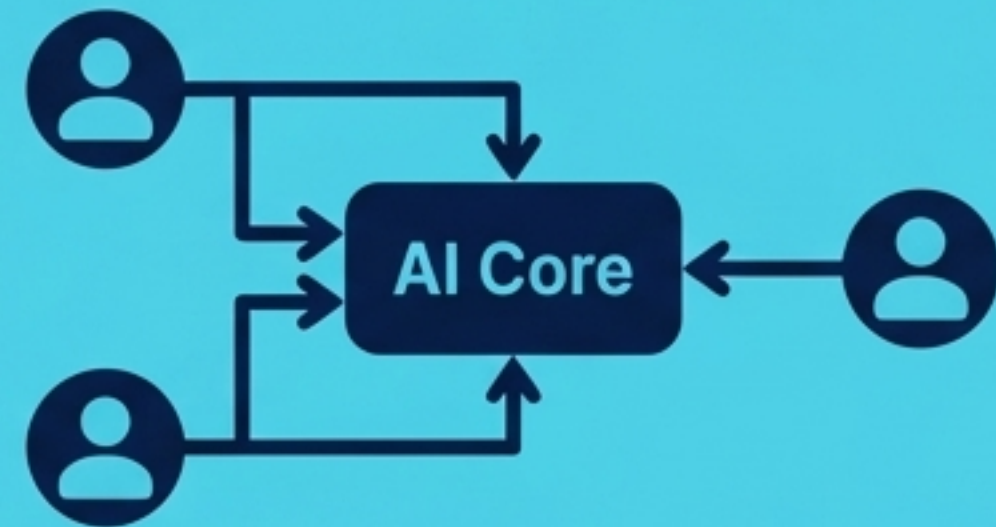

Advanced Integration: Beyond Native Settings

Native Settings (Covered in this guide)

- Ideal for standard, individual configuration.
- Requires manual UI setup per user.

Evershine + Wordly.ai Integration (Advanced Service)

- Ideal for complex, multi-language processing.
- Streamlined, enterprise-grade AI translation environment.

Ready to upgrade your cross-border meetings? We provide dedicated Wordly.ai access to our global clients. Contact our AI Services team for your secure login credentials.
